Traffic data are the three-day average of traffic counts data collection conducted October 8-10, 2013 and represent both directions of travel.

Local trips by passenger vehicles dominate the use of I-35. Of the 226,000 vehicles using I-35 at Braker, only 14% are going all the way through the region without stopping.

Through trucks on I-35 are only a small part of total traffic. These yellow and purple bars represent 4,250 through trucks that could move to SH 130.
