Texas Transportation Poll suggests more Texans turning to phone apps, websites to avoid traffic

First conducted two years ago, the new 2016 Texas Transportation Poll examines the travel behaviors and opinions of more than 4,000 Texans. This year’s results say a lot about Texans’ shifting attitudes on daily transportation choices, challenges, funding, and solutions. Among the findings: Use of technology to avoid traffic is up, reliance on personal auto use is up, and use of alternative modes is down. The longitudinal survey gives state policymakers a view of public sentiment over time. | Read more
